Office Action Summary	Application No. 10/714,940	Applicant(s) QUESADA, FLAVIO	
	Examiner Hugh B. Thompson II	Art Unit 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Specification***

The disclosure is objected to because of the following informalities: on page 12, paragraph 31, “portion 20” should read –portion 26--, and on page 15, paragraph 35, “carrier pin 58” should read –carrier pin 64--. Appropriate correction is required.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “carrier clip” of claims 8, 10, 18, and 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

Art Unit: 3634

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 4, there is no antecedent basis for “the plurality of tracks”. Further, the applicant has never set forth a locked condition of the carrier prior to reciting the step of “unlocking the carrier”.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 22 is rejected under 35 U.S.C. 102(e) as being anticipated by Malek #6,892,494.

Malek, as recited in columns 4 and 5, discloses a window sash assembly and method of use thereof comprised of a U-shaped jamb 38, having tracks as best seen in Figure 8, a sash clip

Art Unit: 3634

assembly 50, 60, mountable to sash 46, a jamb lock 132, a sliding carrier assembly 34 having a sash support portion 110 and carrier lock portion 70, 130, engageable with the jamb lock 132, and the carrier assembly and clip assembly being engageable and disengageable with each other as best seen in Figures 1-4 and 5-8, respectively.

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: for claims 1 and 15, it is the inclusion of the locking mechanism configured to lock the carrier in place along the jamb such that the carrier cannot move toward either an upper or lower extremity of the jamb, i.e., fixed in place. See claim 1, lines 17-19, and claim 15, lines 11-13. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haas #2,791,795, #2,796,630, Weidner #3,206,795, Lundgren #3,233,278, Trout #3,482,354, Martin #3,706,467, Westfall et al #4,885,871, May #4,914,861, #5,027,557,

Westfall #5,189,838, #5,572,828, Kunz et al #6,857,228, and Lucci PAP#US 2005/0166461 A1 are cited to teach sliding shoe assemblies for sashes.
